

USB 2.0 Data Transfer Cable for Memory Cards and Card Readers

This data transfer cable connects memory cards and card readers to computers. It features a standard USB Type-A connector on one end and a Mini-USB connector on the other.

Overview

Reliable Data Connectivity

This high-speed data transfer cable is engineered for seamless connectivity between memory cards, card readers, and computers. Featuring a standard USB Type-A to Mini-USB interface, it offers broad compatibility with various digital devices. Its durable construction is designed to ensure consistent performance and longevity, making it an ideal solution for efficient photo and video data transfer.

Technical Specifications

Primary Application

- Memory card data transfer
- Card reader connectivity
- Photo and video file management
