

USB 3.0 Type-A to Type-C Cable

This cable supports the USB 3.0 standard A interface and adheres to USB 3.0 specifications. It is designed for connecting devices like smartphones, tablets, and laptops to computers or chargers.

Product Overview

High-Performance Fiber Optic Connectivity

This advanced USB 3.0 Type-A to Type-C cable utilizes 850nm multi-mode fiber optic technology to ensure high-speed data transmission while eliminating electromagnetic and radio frequency interference. Designed for extreme durability, it supports over 5 million towline cycles, making it suitable for demanding industrial or professional environments. The cable is fully compliant with USB3.1 Vision standards and operates via plug-and-play functionality, requiring no external power or drivers.

Performance Metrics

Data Transfer Rate

10 Gbps

Maximum Speed

Current Output

900 mA

Max Current

5 V

Voltage

Transmission Distance

60 m

Technical Specifications

Compliance

- USB3.1 Vision standard
- USB3.0 specifications

Key Features

Hot plug support, Driverless, Low power consumption, EMI/RFI protected

Towline Flexibility

> 5 million cycles
