

# USB Battery Charger for Lithium-Ion and Ni-MH Batteries

This USB battery charger is designed for charging batteries efficiently and safely. It features a compact design with multiple charging slots and incorporates overcharge protection and short circuit prevention.

## Product Overview

### Versatile USB Battery Charging Solution

This compact and lightweight USB battery charger is designed for both travel and home convenience. It supports simultaneous charging for multiple batteries with integrated safety features, including overcharge protection and short-circuit prevention. LED indicators provide clear, real-time status updates for each individual slot, ensuring reliable performance for Lithium-Ion and Ni-MH battery types.

## Technical Specifications

### Charging Current

**500 mA**

Per Slot

Input Voltage	5 V
Output Voltage	4.2 V

## Compatibility & Features

### Safety Protections

Overcharge Protection • Short Circuit Prevention

### Ideal Usage

- Travel
- Home Use

Compatible Battery Types	Lithium-Ion, Ni-MH
--------------------------	--------------------

## Design

### Design Highlights

- Compact Form Factor
- Lightweight
- LED Charging Indicators
