

# USB Flash Drive

This USB flash drive provides portable storage for various digital files. Its compact design allows for easy transport and convenient data transfer between devices.

## Product Overview

### Clinical Applications

This product contains a combination of Cefalexin and Trimethoprim, formulated for the effective treatment of bacterial infections. Cefalexin acts as a cephalosporin antibiotic, while Trimethoprim functions as a dihydrofolate reductase inhibitor to provide a synergistic antibacterial effect. Each unit contains 50 capsules, ensuring a sufficient supply for standard treatment protocols.

## Product Details

Dosage Form	Capsules
Quantity per Package	50 capsules
Key Ingredients	Cefalexin, Trimethoprim

## Compliance

Drug Approval Number	H21023738
