Overview

Compact and portable design suitable for various personal spaces.

Compact Cooling Solution

This portable 0.5L mini fridge is an ideal solution for personal cooling needs, perfect for home offices, dorms, or personal workspaces. Designed with versatility in mind, it operates via USB power and features both cooling and heating capabilities to keep beverages and snacks at the perfect temperature. Its compact, lightweight construction ensures it fits easily into small spaces while maintaining efficient insulation.

Technical Specifications

Item Number	MFA-0.5L
Power Source	DC 12V and AC 100V-240V
Power Consumption	48 W
Refrigeration Principle	Semiconductor Refrigeration

Performance

Cooling Capacity	12-16 below ambient temperature
Heating Capacity	50-60 by thermostat
Insulation Material	High density EPS

Accessories

Car Charger Cable Length	2 m
Household Cable Length	1.8 m

Certifications

Our manufacturing process adheres to strict international quality and safety standards.

Certifications	CB, CE, KC, ETL, LFGB, GS, PSE, RoHS
