Product Overview

Innovative Power Solution

This USB rechargeable lithium AAA battery eliminates the need for external chargers by featuring a direct USB charging interface. Engineered for efficiency, it reaches a full charge in just one hour, significantly outperforming traditional charging times. Designed for longevity and environmental sustainability, it supports up to 1000 recharge cycles, offering a highly cost-effective and eco-friendly alternative for diverse electronic applications.

Technical Specifications

Voltage	1.5 V
Capacity	600 mWh
Charging Duration	1 hour
Cycle Life	1000 cycles

Key Features

Advantages	USB Rechargeable, Fast Charging, Eco-Friendly, Leak-Proof Design, Integrated Protection Chip
