Product Overview

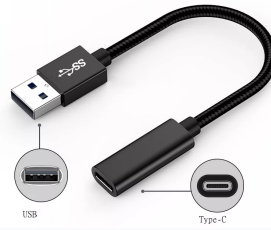

High-Performance Connectivity

This versatile adapter cable provides a seamless bridge between modern USB Type-C devices and standard USB 3.0 peripherals. Engineered for both durability and efficiency, it supports fast SuperSpeed data transmission and reliable charging. Its robust construction, featuring a braided nylon exterior and aluminum shell, ensures long-lasting performance for daily professional use.

Technical Specifications

Combination of appearance and function

The shell is made of aluminum alloy, nylon wrapped wire.
The tensile strength is greatly increased and it is more durable.

Length	0.3 m
Transmission Speed	5000 MB/s
Interface	USB Type-C, USB 3.0
Body Material	High quality nylon braid
Wire Core	Copper core

Features

Charging at any time safe and efficient

Build-in protection, with over-current, safe and fast charging.

Capabilities

- Positive and negative plug orientation
- Fast charging support
- Overcurrent protection
- Overcharge prevention
- Aluminum alloy shell
