

Used Diesel Piston Air Compressor for Mining

This used piston air compressor is powered by a diesel engine. It is designed for heavy-duty use in demanding mining environments.

Overview

Industrial-Grade Compressed Air Solution

This robust, used piston air compressor is engineered for heavy-duty applications in demanding environments such as mining and large-scale industrial operations. Featuring a portable design with a mounted air tank, it offers flexibility and reliable performance on job sites. The unit is powered by a diesel engine, ensuring independence from electrical grids and consistent air delivery for pneumatic tools and machinery.

Technical Specifications

Power Source	Diesel Engine
Compressor Type	Piston
Portability	Yes
Suitable Applications	Mining, Heavy Industry, Pneumatic Tool Operation

Safety and Compliance

Safety Features

- Pressure Gauges
- Safety Valves

Compliance Certification

XK06-T10-00075
