Product Overview

Industrial Marine Power Solution

This listing features high-quality pre-owned marine equipment including a MAN B&W 5L23/30H diesel engine generator set and a compatible crankshaft. The engine unit, manufactured in 2008, offers a power output of 650 kW and is suitable for heavy-duty marine or industrial power generation requirements. Both components have been maintained in good condition, providing a cost-effective solution for vessel maintenance and propulsion power needs.

Engine Specifications

Key Performance Metrics

| | | | |
|-------------------------------|----------------------------------|------------------------------------|--|
| 650 kW Power Output | 768 KVA Apparent Power | 720 RPM Rotational Speed | 18.2 bar Mean Effective Pressure |
|-------------------------------|----------------------------------|------------------------------------|--|

Component Status

Pre-owned • Standard condition • Good working order
