

Used Mining Piston Air Compressor

This is a used piston compressor designed for mining applications. It features a robust construction with a diesel engine and a large air tank. The compressor is mounted on wheels for portability.

Overview

Robust Mining Compressor

This used piston air compressor is engineered specifically for demanding mining environments. Featuring a diesel-powered engine and a large-capacity air tank, it delivers reliable performance for high-demand pneumatic applications. Its portable, wheel-mounted design ensures flexibility for on-site operations, while the integrated pressure gauges and control valves allow for precise management of airflow and pressure.

Technical Specifications

Model Number	HZXKXK06-110-00075
Power Source	Diesel Engine
Compressor Type	Piston

Features

Condition

Used • Mining Grade

Control Components

- Pressure gauges
- Air flow control valves
- Pressure regulation valves

Portability	Yes
