Product Overview

High-Performance Networking Solution

This UTP CAT5 Ethernet cable provides a reliable and flexible solution for data transmission and networking applications. Designed to support 10/100 Mbps networks, it effectively balances performance and durability for diverse installation environments. The cable features high-quality twisted pairs and customizable options to meet specific project requirements.

Technical Specifications

Internal Construction

- 4 Twisted Pairs
- 8 Color-coded conductors
- Optional power wire add-on

Conductor Material	CCA, Copper
--------------------	-------------

Max Transmission Distance	150 m
---------------------------	-------

Design and Customization

Jacket Material	PVC
-----------------	-----

Color Customization	Yes
---------------------	-----
