Product Overview

High-Performance Network Cabling

This unshielded twisted pair (UTP) network cable is engineered for both CAT5e and CAT6 applications, ensuring superior performance in high-speed LAN environments. Designed to exceed industry standards, it supports demanding protocols including Gigabit Ethernet, VoIP, and digital video. The cable features a durable, round design with an integrated rip cord to facilitate easy insulation removal during installation.

Technical Specifications

Supported Categories	CAT5e, CAT6
Tested Frequency	350 MHz

Standards & Compliance

Compliance

- UL E236139
- TIA/EIA-568-B.2
- ISO/IEC 11801

Applications

Supported Applications

- Gigabit Ethernet
- 100BASE-Tx
- VoIP
- Digital Video
- ISDN
- ATM

Physical Features

Design Features

UTP Construction • Round Design • Rip Cord Included
