

# UV Flatbed Printer

This UV true flatbed printer features 24 Spectra high-performance piezoelectric inkjet printing components. The printer's real resolution ranges from 300 to 1200 dpi and is equipped with an automatic safety power-off control lever.

## Overview

### High-Performance UV Flatbed Printing

This UV true flatbed printer is engineered for high-performance industrial printing applications. It utilizes 24 advanced Spectra piezoelectric inkjet components to deliver precise, high-quality output. Designed with operator safety in mind, it includes integrated automatic control features to ensure reliable operation in professional environments.

## Technical Specifications

|                   |                              |
|-------------------|------------------------------|
| Print Head System | 24 components                |
| Technology Type   | Spectra Piezoelectric Inkjet |
