

UV Ozone Sterilization Lamp

This lamp provides sterilization and disinfection using UV and ozone. It is designed for quick results and easy portability.

Product Overview

Easy to move design with customizable 15, 30, and 60-minute cycles.

Dual-Action Sterilization Solution

This UV ozone sterilization lamp provides a dual-function approach to sanitization, combining ultraviolet light with ozone technology for thorough disinfection. It is engineered for versatility and ease of use, making it an ideal choice for maintaining hygienic standards in homes, offices, and other enclosed environments. With remote control capabilities and multiple timer settings, users can achieve efficient sterilization while maintaining a safe distance from the active unit.

Technical Features

Product features highlight UVC technology, quartz glass longevity, and convenient through-wall operation.

Timer Settings

- 15
- 30
- 60

Key Functions

Sterilization • Disinfection • Acarid Control • Odor Removal

Sterilization Methods

UVC Germicidal, Ozone Disinfection

Material Composition

Quartz glass tube

Operation & Control

Safety Features

- Beep reminder

Remote Capabilities

Through-wall remote control
