

# V-Shaped Industrial Glass Thermometer

This V-shaped industrial glass thermometer measures temperatures from 0-100°C/F. It features a 90-degree angle, 1/2" NPT connection, and durable brass construction.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Temperature Precision

The V-Shaped Industrial Glass Thermometer is engineered for accurate temperature monitoring in demanding industrial environments. Featuring a robust design with a protective thermowell, it ensures reliable performance and longevity. This versatile instrument is available in straight, 90-degree, and 135-degree angle configurations to suit various installation requirements.

## Technical Specifications

Temperature Range	0-100 °C/F
Connection Type	1/2" NPT
Construction Material	Brass

## Dimensions

### Key Dimensions

**150 mm**  
Height (H)

**63 mm**  
Length (L)

## Configuration Options

Available Configurations	Straight, 90° Angle, 135° Angle
--------------------------	---------------------------------

## Features

### Key Features

- V-shaped glass design for easy reading
- Robust construction for demanding environments
- Includes protective thermowell for durability
- Threaded connection for secure installation
