

V-Wire Water Well Screen

The V-wire water well screen is designed for efficient water filtration in well applications. Its V-shaped wire construction provides a large open area, minimizing head loss and maximizing water flow.

Product Overview

High-Performance V-Wire Well Screen

This V-wire water well screen is engineered for superior water filtration and long-term well efficiency. Featuring a continuous V-shaped slot design, it provides an exceptionally large open area that minimizes frictional head loss and prevents clogging. The robust, welded stainless steel construction ensures durability and reliability in demanding industrial and water well environments.

Technical Specifications

Standard Lengths

- 1m
- 5.85m

Connection Styles

Welding • Threaded Male/Female Coupling

Material Options

302 Stainless Steel, 304 Stainless Steel, 304L Stainless Steel, 316 Stainless Steel, 316L Stainless Steel

Minimum Slot Size

0.05 mm

Performance Metrics

Performance Highlights

25 %

Potential Power Savings

2 x

Open Area Advantage

Key Benefits

- Continuous slot design prevents clogging
- Reduced pump load and energy consumption
- Superior sand filtration control
- Heat and corrosion resistant
- Improved tube well efficiency
