

Vacuum Cleaner Head Attachment with Adjustable Brush Height

This vacuum cleaner head attachment is designed for use on various floor surfaces. It features a pivoting neck for maneuverability and a foot-operated switch for adjusting brush height.

Product Overview

Versatile Cleaning Performance

This vacuum cleaner head attachment is engineered for superior versatility across various floor surfaces. Featuring a smooth-pivoting neck, it offers exceptional maneuverability in tight spaces and around furniture. The integrated foot-operated switch allows for quick and seamless adjustments to the brush height, ensuring optimal suction and cleaning efficiency.

Physical Specifications

Construction Material	Durable High-Impact Plastic
