

Vacuum Pump

This vacuum pump is designed for industrial applications. It provides efficient and reliable performance for various processes.

Product Overview

Professional Grade Coffee Brewing

This durable stainless steel coffee urn is engineered for high-demand environments, making it an excellent solution for catering events and professional office settings. It features an integrated water level gauge for precise monitoring and a non-drip faucet to ensure mess-free serving. With dedicated indicator lights for heating and keep-warm cycles, this urn provides consistent performance and convenience for large-scale coffee preparation.

Construction & Design

Material	Stainless steel
Key Features	Water level gauge, Non-drip faucet, Heating indicator, Keep-warm function, Carry handles

Usage

Suitable Environments

- Catering events
- Corporate offices
- High-demand hospitality areas
