Overview

High-Efficiency Vacuum Laminating

This vacuum PVC laminating press is designed for professional woodworking applications, offering precise lamination of PVC films onto various substrates. It features a robust construction and a powerful vacuum system to ensure uniform adhesion, making it ideal for the production of high-quality furniture components, cabinet doors, and decorative panels. The machine includes user-friendly controls for heating and vacuum pressure, streamlining production while maintaining a flawless finish.

Technical Specifications

Worktable Options

- 2550 x 1100 mm
- 2550 x 1300 mm

Overall Dimensions

5500 x 1400 x 1300 mm

Max. Working Thickness

50 mm

Net Weight

1100 kg

Performance Metrics

Performance Overview

18.5 kW

Total Power

8 kW

Actual Consumption

-0.09 Mpa
