

Valve Electric Actuator for Rotary Valves

Electric actuator designed for 90-degree rotary valves like butterfly, ball, and plug valves. It facilitates remote or on-site control for valve opening, closing, and adjustment.

Product Overview

Industrial Rotary Valve Actuation

This electric valve actuator provides high-precision control for 90-degree rotary valves, including butterfly, ball, plug, and damper baffle configurations. Designed for versatile industrial automation, it supports both remote and on-site operation, ensuring reliable performance in demanding fluid and gas management systems. The unit is engineered for integration across diverse sectors such as electric power, chemical processing, and water treatment.

Compatibility & Application

Suitable Industries

- Electric Power
- Metallurgy
- Petroleum
- Chemical
- Food & Beverage
- Textile
- Paper Making
- Pharmacy
- Water & Sewage Treatment

Supported Valve Types

Butterfly Valve, Ball Valve, Plug Valve, Damper Baffle

Technical Specifications

Model Variants

Type	Application Note
Q / DQ	Outdoor Use
QB	Flameproof
QZ	Integrated/Whole
QT	External Regulation

Compliance Standards

JB/T8528-1997 • JB/T8529-1997 • GB3836.1-2000 • GB3836.2-2000
