

Variable Speed Impact Drill

This impact drill is designed for a variety of drilling and fastening tasks. It features a robust motor, variable speed control, and an ergonomic design, making it suitable for use on wood, metal, and concrete.

Product Overview

Versatile Drilling Performance

This variable speed impact drill is engineered for professional versatility, offering both standard drilling and impact drilling functions. It features electronic speed adjustment and a reverse function to handle a wide range of materials including wood, metal, and concrete. Designed with user comfort in mind, the tool includes a soft grip and a lock-on function for extended operation.
