

Variable Voltage E-Cigarette Battery

This e-cigarette battery features adjustable voltage via a twistable dial. It is compatible with eGo-threaded atomizers and clearomizers and is USB rechargeable.

Product Overview

Professional Variable Voltage Battery

This variable voltage battery offers a customizable vaping experience, allowing users to fine-tune output between 3.2V and 4.8V via a convenient bottom-mounted dial. Designed with safety as a priority, it includes integrated protections against short-circuits, low voltage, and accidental activation. It is fully compatible with standard eGo-threaded atomizers and supports easy recharging via USB.

Technical Specifications

Voltage Range

3.2 V

Minimum Voltage

4.8 V

Maximum Voltage

Low Voltage Protection

3.3 V

Atomizer Protection

10 seconds

Safety Features

Safety Protections

- Short-circuit protection
- Low voltage protection
- Atomizer protection (10-second cutoff)
- Switch protection (5-click lock/unlock)

Compatibility & Design

Available Colors

White • Purple • Black • Mazarine • Pink • Silver

Charger Compatibility

eGo USB charger
