

Vegetable Seedling Transplanter

This vegetable transplanter is designed for efficient and precise transplanting of vegetable seedlings. The machine features a robust frame, adjustable planting depth, and row spacing to accommodate various crop types.

Product Overview

Professional Vegetable Seedling Transplanter

This high-efficiency vegetable seedling transplanter significantly improves agricultural productivity, achieving rates 4-5 times faster than manual transplanting. Designed for adaptability, it supports both naked and pot seedlings across a wide variety of vegetable crops. The robust machine integrates multiple functions including ditching, planting, soil covering, and watering to ensure high survival rates and optimal growth conditions.

Technical Specifications

Planting Depth	40 mm
Hill Spacing Range	23-78 cm (12 Grades)
Row Spacing Range	25-130 cm (Adjustable)

Operational Requirements

Minimum Power Requirement

30 Hp

1-2 Rows

50 Hp

3-5 Rows

Capabilities

Integrated Functions

- Ditching
- Planting
- Soil Covering
- Pressing
- Watering
- Fertilizing
- Film Spreading

Supported Crops

Broccoli, Mint, Cabbage, Tomato, Cassava, Pineapple, Celery, Tobacco, Cotton, Lettuce, Chili, Rape, Sweet Potato
