Overview

Professional Vegetation Management

This robust flail mower is engineered for efficient vegetation cutting and mulching in agricultural and landscaping environments. Featuring a powerful gasoline engine and a wide cutting deck, it is designed to handle demanding tasks while pulverizing plant material into fine mulch. Its durable construction, adjustable settings, and maneuverability make it an ideal solution for maintaining fields, orchards, and varying terrains.

Performance Metrics

Engine Power

3 KW

Power Output

173 CC

Displacement

8.8 NM
