

Vehicle Speed Monitoring Device with Digital Display

This device monitors vehicle speed and displays it on a digital screen. It also shows any restricted speed limits.

Product Overview

Professional Vehicle Diagnostic System

This wireless vehicle diagnostic scanner is designed for 1996 and newer OBD II compliant vehicles, including cars and light trucks. Featuring a high-contrast backlit LCD, it provides real-time access to diagnostic trouble codes, freeze frame data, and vehicle status information. The modular system includes a handheld terminal and a dedicated vehicle terminal to ensure efficient connectivity and ease of use for technicians.

Technical Specifications

Battery Capacity

280 mAH
Capacity

3.7 V
Voltage

Wireless Range	30 m
Standby Time	4 Hours
Operating Temperature	0 to 50 Celsius (32 to 122 Fahrenheit)
Display Resolution	128x64 pixel backlit LCD

Dimensions

Device Dimensions

Component	Size
Host Terminal	108mm x 84mm x 21mm
OBDII Module	50mm x 47mm x 28mm

Compatibility & Features

Key Functions

- Read and clear generic DTCs
- Read and clear manufacturer specific DTCs
- Freeze Frame Data reading
- I/M Reading Status
- Vehicle info retrieval

Supported Protocols	VPW, PWM, ISO, KWP 2000, CAN
