

Vehicle Tail Light Assembly

This tail lamp assembly is designed for vehicles. It provides essential lighting functions for safety and visibility, including brake lights, turn signals, and running lights.

Product Overview

High-Performance Vehicle Tail Light

This tail lamp assembly is designed for Sunny/Versa vehicles, providing essential lighting functions including brake lights, turn signals, and running lights. Engineered for a precise fit, the unit ensures seamless integration with the vehicle's electrical system while meeting or exceeding OEM specifications. Built from durable materials, it is constructed to provide long-lasting performance and reliable resistance to harsh environmental factors.

Technical Specifications

Vehicle Compatibility

- Sunny
- Versa

Factory Code	wt-29-f-102
