

Vehicle Trunk Interior Side Panel

This molded interior side panel is designed for vehicle trunks. It is typically made of carpeted or felt-like material and enhances the vehicle's trunk space.

Product Overview

Vehicle Trunk Interior Side Panel

This premium interior side panel is precision-molded to fit the complex contours of a vehicle trunk. Crafted from durable, high-quality carpeted material, it provides a clean aesthetic finish while serving as a functional barrier. The design features a recessed section specifically engineered to accommodate trunk storage or internal components, helping to reduce noise and vibration within the cargo space.
