

Vented Ball Style Dirt Collector Body

This is a cast metal body component for dirt collection or filtration systems. It features a vented design and flanged connection for secure mounting in machinery.

Product Overview

Vented Ball Style Dirt Collector Body

This industrial-grade dirt collector body features a robust, vented ball-style design suitable for demanding fluid or gas handling applications. Engineered for durability, the component includes a flanged connection with pre-drilled bolt holes to ensure secure mounting within filtration or processing systems. Its heavy-duty construction makes it an essential part for maintaining system integrity and preventing debris accumulation in industrial machinery.

Technical Specifications

Design Style	Vented Ball Style
Component Type	Dirt Collector Body
Mounting	Flanged with bolt holes
Construction	Cast Metal, Industrial Grade
