Product Overview

Efficient Charcoal Grilling

This ventilated charcoal barbecue is engineered for fast and even cooking through an integrated airflow system. Users can precisely manage heat levels by adjusting the speed of the built-in ventilation fans. Designed for durability and convenience, it features a steel construction and a removable ash catcher, making it a reliable solution for professional outdoor culinary applications.

Technical Dimensions

Physical Specs

Component	Diameter
Top	37.8
Bottom	25.5
Cooking Grid	35
Height	19 cm

Performance

Temperature Control	Yes
Ventilation Mechanism	Adjustable fan speed for combustion control

Features

Included Features

- Built-in thermometer
- Removable ash catcher
- Portable design
- Easy assembly

Materials

Steel Body, Chrome-plated Grate
