

# Ventilation Fan Component with Red Indicator

This component is designed for ventilation fans. It features a curved, padded design with vertical grooves and a central, oval-shaped red indicator.

## Product Overview

### Professional Ventilation Component

This high-quality electrical component is specifically engineered for integration into air conditioning and ventilation systems. Featuring a durable, smooth synthetic construction, it includes a distinctive red indicator for quick status identification. Its rectangular, grooved design ensures optimal airflow management and seamless installation in professional HVAC settings.

### Visual Indicators

Red status indicator

## Physical Characteristics

### Material

Smooth synthetic material

### Design Features

Rectangular shape, Vertical grooves, Curved profile, Padded design

## Application

### Intended Use

- Air conditioning systems
- Ventilation equipment
- Exhaust fan assemblies
