

Vertical Blade Cutting Machine

This industrial cutting machine features a vertical blade for precision cutting of various materials. Constructed with a robust metal frame and base, it offers stability and adjustable settings for controlling cutting depth and speed.

Overview

Industrial Vertical Blade Cutting Machine

The VER 2000 is a robust industrial cutting solution designed for precision and reliability. Built with a heavy-duty metal frame and base, this machine ensures stability during operation for high-quality results. It features a vertically oriented blade system capable of handling various sheet materials, including fabrics and leather, making it a versatile tool for professional manufacturing environments.

Technical Specifications

Model Identifier	VER 2000
Construction	Metal Frame, Stable Base
Operation	Manual operation with electric motor assist

Capabilities

Compatible Materials

- Fabrics
- Leather
- Sheet materials

Adjustable Settings

Cutting Depth • Cutting Speed
