Overview

High-Efficiency Vertical Packaging Solution

This automated vertical form-fill-seal (VFFS) packaging machine is engineered for the precise and high-speed packaging of granular products, powders, liquids, and small solid items. Featuring a robust stainless steel construction, it ensures durability and hygiene standards necessary for the food, pharmaceutical, and chemical industries. The system integrates advanced PLC controls, a multi-head weigher for accurate dosing, and flexible sealing mechanisms to produce consistent, airtight pillow or gusseted bags.

Technical Capabilities

Suitable Product Types

- Granular products
- Powders
- Liquids
- Small solid items

Compatible Packaging Types

Pillow bags, Gusseted bags, Sachets, Pouches

Key Features

Automation & Control

PLC Control • Automated Operation • Adjustable Filling Volume • Precise Dosing • Date Coding Capability

Performance Metrics

1 Yes

High-Speed Operation

Construction Material

Stainless Steel
