

Vertical Machining Center

This vertical machining center is designed for the precision machining of various materials. It features a rigid structure that enhances stability and accuracy during high-speed cutting operations.

Product Overview

High-Performance Vertical Machining Center

The VBZ900BL is a high-performance vertical machining center engineered for the precision processing of diverse materials. Designed with a rigid structure for enhanced stability, it ensures high accuracy during high-speed cutting operations. The unit is optimized for demanding industries such as aerospace, automotive, and general manufacturing where precision and high productivity are essential.

Technical Features

Key Machine Capabilities

- High-capacity automatic tool changer
- Advanced CNC control system
- Integrated coolant management
- Efficient chip removal system

Performance Metrics

900 ID

Model Series Designation

Industry Suitability

Applications

Aerospace, Automotive, General Manufacturing
