

Vertical Milling and Drilling Machine

This vertical milling and drilling machine is designed for precision metalworking. It features a robust construction, variable speed control, and adjustable worktable for versatile machining operations.

Product Overview

Versatile Precision Machining

This vertical milling and drilling machine is designed for robust performance in metalworking environments. It supports a wide range of tasks including drilling, milling, tapping, boring, and reaming. Built for professional use, the machine offers high rigidity, precise positioning, and a 360-degree swiveling headstock to handle complex operations with ease.

Performance Specifications

Spindle System

- Belt-driven
- Micro feed precision
- Positive spindle lock
- 360-degree horizontal swivel

Primary Operations	Milling, Drilling, Tapping, Boring, Reaming
Speed Settings	12 steps

Design and Build

Build Quality

Round Column • Strong Rigidity • Adjustable Gibs • Table Precision
