

Vertical Milling Machine

This vertical milling machine is designed for machining metal and other materials. It features a worktable, a vertical spindle, and controls for adjusting parameters, with coolant and chip conveyor systems for high-volume material removal.

Overview

Industrial Vertical Milling Machine

The TZ-602 is a heavy-duty vertical milling machine engineered for high-volume industrial material removal. Designed for precision and durability, it features a robust vertical spindle and a spacious worktable capable of securing complex workpieces. Equipped with advanced multi-axis control, integrated coolant systems, and efficient chip conveyors, this machine is built to handle demanding machining tasks with reliability and consistency.

Technical Specifications

Model Number	TZ-602
Machine Type	Vertical Milling Machine
Control System	Multi-axis control

Features

Application Suitability

High-volume Production • Metal Machining • Industrial Manufacturing

Key Features

Heavy-duty, Industrial Grade, Multi-axis Control, Coolant System Included, Chip Conveyor Included
