Product Overview

High-Performance Vertical Roller Mill Tyre

This vertical roller mill tyre is engineered as a single-cast structure to provide superior impact resistance and structural integrity, preventing detachment during operation. Utilizing advanced high chromium cast iron, it offers exceptional wear resistance and hardness, maintaining a surface hardness exceeding HRC60. Designed for compatibility across a wide range of vertical mill series, this component effectively reduces mill vibration and protects the roller body, ensuring a longer service life compared to standard alternatives.

Technical Specifications

Surface Hardness

60 HRC

Minimum Hardness

Material Options

High Chromium Cast Iron, Nickel Hard Cast Iron, Metal Composite Ceramics, Composite Wear-Resistant Materials

Compatibility

Supported Mill Series

- ATOX
- LM
- MPS
- RM
- CKP
- MLS
- MPF
- TRM
- HRM
- ZGM

Performance

Lifespan Improvement

10 %
