

Vortex Water Pump for Drainage and Irrigation

This vortex pump is a robust solution for drainage and irrigation needs. Its design is suitable for handling liquids containing solids, making it perfect for agricultural applications.

Product Overview

Vortex PM45 Pump Performance

The PM45 Vortex Pump is a robust and efficient solution engineered for reliable performance in drainage and agricultural irrigation applications. Its specialized vortex impeller design allows for the efficient handling of liquids containing solids, making it ideal for clearing sumps, ditches, and sources with debris. Built for long-lasting operation, this pump combines durable construction with easy maintenance, ensuring consistent water distribution and productivity in demanding environments.

Key Features

Ideal Applications

Agricultural Irrigation, Drainage, Sump Clearing, Ditch Water Management

Technical Capabilities

Solids Handling

Yes

Maintenance

Ease of Service

Easy Installation • Low Maintenance
