

VT Type Heavy-Duty Chain Block

This chain block is a robust lifting device suited for heavy-duty applications. It features durable steel construction for exceptional strength, along with an efficient gear system ensuring smooth operation and secure load handling.

Product Overview

Robust Lifting Performance

The VT Type Chain Block is a high-performance lifting solution engineered for rigorous heavy-duty environments. Constructed from durable steel, it offers superior load-bearing capacity and long-term reliability for industrial operations. Its specialized gear system facilitates smooth, precise control, while the integrated safety latch system ensures maximum security during operation.

Key Features

Features

- Durable steel construction
- High-efficiency gear system
- Integrated safety latch on hooks
- Precision lifting capability

Applications

Suitable Environments

Construction, Manufacturing, Maintenance
