

Walk-Behind Diesel Tractor for Agriculture

This walk-behind tractor is designed for diverse agricultural tasks. Its single-cylinder diesel engine features a belt-driven transmission and heavy-duty tires for optimal traction.

Product Overview

Rugged Agriculture Solution

This walk-behind diesel tractor is engineered for professional agricultural environments, offering a reliable, high-torque solution for soil preparation. Featuring a robust single-cylinder diesel engine and a durable belt-driven transmission, it delivers consistent power for demanding tilling and plowing tasks. Its design prioritizes operational longevity and operator comfort with heavy-duty traction and an adjustable handlebar system.

Technical Specifications

Engine Type	Single-cylinder diesel
Transmission Type	Belt-driven

Key Features

Operator Features

- Adjustable handlebar for comfort
- Ergonomic control layout
- Heavy-duty tires for terrain versatility

Primary Applications	Plowing, Tilling, Soil Preparation
