

Walk Behind Plate Compactor

These plate compactors are walk-behind machines. They offer variable vibration frequency, traveling speed and vibrating force.

Overview

High-Performance Plate Compactors

These walk-behind plate compactors are engineered for professional construction and landscaping applications. Designed for efficiency and durability, the series offers a range of models to suit different job site requirements, from light-duty compaction to heavy-duty soil and asphalt work. Each unit features robust vibration technology and optimized power-to-weight ratios to ensure consistent performance and ease of operation.

Performance Data

Vibration Frequency

5600 V.P.M
C-60/C-80/C-80W

5800 V.P.M
C-120/C-120W

4000 V.P.M
C-160

Maximum Grade

d20°

Technical Specifications

Model Specifications Comparison

Model	Speed (m/min)	Force (Kg)	Weight (Kg)	Power (HP)
C-60	15-20	1050	60	5
C-80	15-20	1350	75	5
C-80W	15-20	1350	80	5
C-120	20-25	2100	110	5.5
C-120W	20-25	2100	115	6.5
C-160	25-28	3000	155	6.5

Available Model Series

C-60, C-80, C-80W, C-120, C-120W, C-160
