

Walk-Behind Snow Blower

This snow blower is designed for clearing snow from outdoor areas like driveways and sidewalks. It uses a gasoline engine to power an auger that scoops and throws snow through an adjustable chute.

Overview

Efficient Snow Management

This walk-behind snow blower is engineered for reliable snow clearing on driveways, sidewalks, and residential outdoor areas. Powered by a 196cc engine, it features a 530mm clearing width and a 500mm intake height, making it capable of handling significant snowfall. With adjustable throwing distances and a 190-degree chute rotation, operators can precisely control snow placement for efficient site maintenance.

Engine & Performance

Max Engine Power

6.5 HP

Power

3600 r/min

Engine Speed

Engine Displacement	196 cc
Fuel Tank Capacity	3.6 L

Operation & Control

Transmission Speeds

Direction	Gears	Speed Range
Forward	5	1.5-5 Km/h
Backward	2	1.0-2.0 Km/h

Starting System	Recoil Start, Electric Start
Battery Specifications	12V/12AH

Clearing Capacity

Clearing Dimensions

530 mm

Width

500 mm

Height

Snow Throwing Distance	6 M
Chute Rotation	190 °
