Product Overview

Built for Performance and Reliability

This walk-behind snow thrower is engineered for durability and ease of operation, featuring a robust Loncin engine and a serrated steel auger designed to cut through dense snow and ice. Its compact, user-friendly design includes practical features like LED lighting, heated hand grips, and convenient one-hand operation. With a top-loaded aluminum gear case to prevent oil leakage, this machine is built to provide consistent, reliable performance throughout the winter season.

Engine & Transmission

Engine Displacement	212 cc
Start Mode	Electric start
Transmission Type	Friction disc
Speeds	5 Forward, 2 Reverse

Performance & Dimensions

Key Performance Metrics

660 mm
Clearing Width

11 m
Throwing Distance

Intake Height	510 cm
