

Walking Tractor 11.03kW

This walking tractor delivers 11.03kW of rated output for agricultural tasks. Its design includes sturdy wheels, adjustable controls, and an S1100 series engine.

Product Overview

Versatile Agricultural Power

The GN121-15 walking tractor is a robust and efficient agricultural machine engineered for diverse field operations. Designed with a focus on reliability and versatility, it serves as an essential tool for plowing, tilling, and general land cultivation tasks. Its high-output engine and adaptable wheelbase make it suitable for a variety of farming environments, ensuring consistent performance for professional agricultural needs.

Technical Specifications

Rated Power Output

11.03 kW
Power Output

Dry Weight	380 kg
Minimum Ground Clearance	210 mm
Tire Size	6.00-12

Dimensions

Adjustable Wheelbase

- 570
- 1090

Dimensions (L x W x H)	1950 x 980 x 1240 mm
