

Walking Tractor

The walking tractor is a versatile machine designed for various farming tasks such as plowing and tilling. Its compact design and compatibility with multiple attachments make it a multifunctional tool for small to medium-sized farms.

Product Overview

DF121 Versatile Walking Tractor

The DF121 is a heavy-duty walking tractor engineered for a wide range of agricultural soil preparation tasks including plowing and tilling. It features a robust diesel engine and a multi-gear manual transmission, offering the versatility needed for different terrains and farming requirements. Its compact, durable frame and adjustable wheelbase provide exceptional maneuverability and operator control for small to medium-sized agricultural operations.

Technical Specifications

Engine Model	S195G / S195GN / S195GNM
Rated Output	9 kW
Machine Weight	509 / 499 (including engine)
Min Ground Clearance	182 mm
Adjustable Wheelbase	800mm, 740mm, 640mm, 580mm
Overall Dimensions	2680 x 960 x 1250 mm

Transmission

Transmission Speed Chart
