

Wall Hung Gas Boiler

This wall hung gas boiler features intelligent PCB control for convenient usage and malfunction analysis. Its advanced burning technology ensures high heating efficiency and it includes various protection measures.

Product Overview

High-Efficiency Wall Hung Gas Boiler

This advanced wall-hung gas boiler leverages over 40 years of European heating technology to provide reliable, localized climate control. Designed for versatility, the system supports both heating and domestic hot water needs with over 20 integrated safety protection measures. It offers superior energy efficiency reaching up to 97% for condensing models, making it an eco-friendly and powerful alternative to traditional central or electrical heating systems.

Performance Metrics

Key Performance Indicators

97 %

Max Heating Efficiency

13 kW

Minimum Capacity

99 kW
