

Wall-Mounted Split Air Conditioner

This split air conditioning system consists of an indoor and outdoor unit. It provides efficient cooling and climate control for residential or commercial spaces.

Product Overview

Modern Wall-Mounted Cooling Solution

This split air conditioning system offers a sophisticated climate control solution for residential or commercial spaces. The system consists of a sleek indoor unit designed for optimal air distribution and a robust outdoor unit housing the high-performance compressor. With its modern aesthetic and included remote control, it provides a balance of style, convenience, and efficient cooling performance.

System Components

System Type

Split System • Wall-Mounted • Indoor & Outdoor Units

Design & Features

Indoor Unit Features

- Sleek, modern chassis
- Horizontal grilles for wide air distribution
- Compact wall-mount profile

Control Method

Handheld Remote Control

Outdoor Unit Specifications

Outdoor Unit Construction

- Integrated compressor housing
- Circular fan with protective safety grille
- Weather-resistant casing
