

Wall Mounted Split Air Conditioner

This high-efficiency wall-mounted split-type air conditioning unit is designed for residential or commercial use. It utilizes advanced refrigerant technology for optimal cooling performance, energy efficiency, and a multi-stage filtration system.

Product Overview

High-Efficiency Cooling Performance

This wall-mounted split-type air conditioner is designed for versatile residential and commercial applications. Engineered for optimal cooling performance, the system utilizes advanced refrigerant technology to ensure high energy efficiency. Its sleek and modern design integrates seamlessly into any interior environment while providing superior air quality through a multi-stage filtration system.

Technical Specifications

Control Options

- Adjustable temperature settings
- Multiple fan speeds
- Programmable timer

Air Filtration

Dust Removal, Allergen Reduction, Odor Elimination

Installation and Compliance

Installation

Professional Installation Required
