

Wall-Mounted Water Heater with Digital Display

This wall-mounted water heater features a digital display and control panel. It is constructed from stainless steel and includes a flue for venting exhaust gases.

Product Overview

High-Efficiency Instant Heating

This wall-mounted water heater is designed for precision temperature control, ensuring a steady supply of hot water for commercial or domestic use. It features an integrated digital display and a user-friendly control interface, allowing for easy monitoring and adjustment. The robust stainless steel housing and specialized venting system make it a durable and safe solution for various professional environments.

Technical Specifications

Capacity

12 L

Capacity

Construction Material

Stainless steel

Key Features

Digital Display, Constant Temperature Control, Instant Heating, Wall-mounted

Installation

Water Connections

- Bottom inlet connection
- Bottom outlet connection

Exhaust System

Top-mounted flue for exhaust gas venting
