

Wall-Mounted Water Purification Machine

This wall-mounted machine purifies water through a multi-stage filtration system. It incorporates PP cotton, granular activated carbon (GAC), and carbon block (CTO) filters.

Product Overview

Professional Water Purification Solution

This wall-mounted water purification machine is designed to provide high-quality, safe drinking water for residential use. Utilizing a comprehensive multi-stage filtration process, it effectively addresses impurities to ensure clean water output. Its compact, space-saving design is suitable for various household environments while maintaining high filtration performance.
