

Washing Machine Drain Motor

This washing machine drain motor opens and closes the drain valve. It removes water from the washing machine during the drain cycle.

Product Overview

High-Performance Washing Machine Drain Motor

The PQD-702S drain motor is a high-performance actuator designed for reliable drainage cycle operations in washing machines. Built for durability, this component ensures consistent valve engagement with a service life exceeding 50,000 cycles. Its robust design and precise mechanical specifications make it an ideal replacement part for maintenance and repair professionals.

Performance Metrics

Rated Voltage	220 V
Input Power	6 W
Traction Force	80 N
Service Life	50000 cycles

Technical Specifications

Insulation Grade	E
Model Number	PQD-702S
Rated Frequency	50 Hz
Insulation Resistance	50 M Ω

Physical Dimensions

Working Operation Stroke	22.5 mm
Bolt Center Distance	85 mm
Clutch Mesh Reset Force	9.8 N
